

Training Seminar

Presented by Missouri Association of Code Enforcement and St. Louis Association of Code Enforcement

What's Bugging You: Common Infestations and Solutions

SEMINAR DESCRIPTION

Insect and rodent infestations are among the many challenges facing Code Enforcement Officers. Bedbugs, roaches, spiders, ants, termites, fleas and mice – or combinations thereof – can and do infest single family, multi-family and commercial structures. This seminar will help you learn how to look for and identify different types of infestations and the most effective methods for eliminating them. Learn how factors such as 2011's mild winter and 2012's summer drought, affect insect populations and the likelihood of them entering a structure. This presentation will also deal with the potential risk to Code Enforcement Officers as we venture inside structures where infestations exist. The seminar includes a Powerpoint presentation and extensive interaction between the instructor and participants, with questions invited and answers being provided throughout the seminar.

ABOUT THE INSTRUCTOR

Dustin Stillman is the Service Manager for Amco Ranger Termite and Pest Solutions, a family-owned company in business in the St. Louis area for 47 years. Dustin has over 12 years' experience in the Pest Control industry and has seen and tackled some of the worst insect and rodent infestations. He also has extensive knowledge of wildlife control. As the Service Manager for Amco Ranger, Dustin trains their technicians and helps educate the public and interested groups about infestations.

Stillman presented this seminar at the 2012 MACA/MACE Fall Educational Conference. If you didn't get a chance to attend or want to see it again, now is your opportunity. This class was very well received by attendees and is one you won't want to miss.

January 30, 2013 • Sign-in at 8:00 a.m. • Seminar Hours 8:30 am to Noon
