If check payment is preferred, please mail a check – made payable to MFMA – to:

Asst. Chief Marc Ulses |
Frontenac Fire Department |
10555 Clayton Road | Saint
Louis, Missouri 63131

This seminar will introduce the application of the International Fire Code (IFC) administrative requirements, occupancy classification, general precautions against fire, emergency planning and preparedness, fire service features, interior finish, decorative materials and furnishings, fire protection systems, means of egress, and provide an introduction to hazardous materials. Activities and discussions will further enhance participant learning.

Learning objectives:

- Identify how the IFC addresses hazardous materials.
- Explain the fundamental provisions of the IFC.
- Describe the intent and scope of the IFC.
- Identify common fire hazards and understand how the IFC addresses correction, or elimination, of the hazards.
- Identify how life safety and fire protection issues are addressed in building design and construction.

Instructor: **John Swanson**

John has worked in the fire prevention industry at both the state and local level for nearly 15 years. He is currently employed with the Minnesota State Fire Marshal Division as a School Inspector/Plans Examiner, where he is responsible for reviewing fire alarm system drawings for most of the public schools in the state of Minnesota. He currently represents the MN State Fire Marshal on several state and national code development committees; including NFPA 72, NFPA 10, the Minnesota State Fire Chiefs Code Committee, the Minnesota State Fire Marshal Division fire code variance review panel, and the Minnesota Construction Codes and Licensing Division Accessibility Review Board. John also serves as a contract instructor for the International Code Council and the National Fire Academy.
