

2016 SPRING TRAINING SEMINAR

MISSOURI ASSOCIATION OF CODE ENFORCEMENT

**COURTYARD BY MARRIOTT
3301 LEMONE INDUSTRIAL BLVD
SALON A & B
COLUMBIA, MO**

The Missouri Department of Conservation protects and manages Missouri's fish, forest and wildlife resources. They also facilitate participation in resource management activities and provide opportunities to learn about nature. The International Property Maintenance Code requires Code Officials to enforce weed violations and we should know the difference. During this training seminar, participants will learn how to identify noxious weeds and native Missouri plants. As Code Officials, we are also called upon to identify and enforce the removal of hazardous and dead trees. The MDC will educate participants on how to identify these hazardous conditions, causes of these conditions, the MDC's plan of action for invasive pests causing the conditions and how we can educate our residents.

Approved by ICC for 0.5 C.E.U. Credits.

APRIL 12TH, 2016

9:30AM—3:30PM
