

Jeff Escott | [jeff.escott@tmi-asg.com](mailto:jeff.escott@tmi-asg.com) | Thermal Mechanics Aftermarket Solutions Group

Jeff Escott is a Building Owner account representative for Thermal Mechanics Inc ASG. Jeff has been with Thermal Mechanics for just over 3 years and specializes in owner relations as it relates to existing HVAC applications. Jeff works with a diverse group of Building Owners and their respective systems in K-12, Higher Education, Manufacturing, Healthcare, State and Local Government in addition to the many ownership groups based in the Private Business sector. Jeff's primary responsibility is to provide solutions to Building Owner challenges, as they relate to the Mechanical operation of HVAC applications, by connecting the professional experts both inside and outside of Thermal Mechanics. In addition to offering a complete solution based approach to building owner challenges, Jeff participates in providing educational opportunities for Building Owners by arranging for Product Seminars on existing and emerging technologies. Jeff has presented to the Missouri School Plant Managers Association (K-12 Facilities Management Group for the State of Missouri) at the Annual Conference for continuing education credit (Indoor Air Quality Presentation), hosted continuing education for MU Healthcare, hosted local presentations for the K-12 Facilities Group and Healthcare Facilities – all with an emphasis on Indoor Air Quality. Thermal Mechanics hosted the local chapter of the MABOI association in early 2018 for a presentation on emerging technologies with a component on Indoor Air Quality that Jeff presented to the group on featuring Global Plasma Technologies.
